

Gabriel Esteban Rodríguez Delgado

Backend Software Engineer • C# / .NET • Distributed Systems • Technical Leadership

gabriel.rodriguezest@gmail.com | linkedin.com/in/gabriel-esteban-rd/ | github.com/KITEG21 | gabrielrd.me

PROFESSIONAL SUMMARY

Backend Software Engineer and Tech Lead with 5+ years building production systems in C#/.NET — from multi-tenant booking platforms to distributed hotel microservices handling contracts, payments and reservations at scale. Progressed from individual contributor to leading small engineering teams, taking ownership of architecture decisions, service design and backend delivery. Most effective working on complex backend problems: distributed workflows, performance bottlenecks, event-driven systems, and translating messy business requirements into clean, maintainable code.

PROFESSIONAL EXPERIENCE

CEO & Co-Founder | Horizon.gh

Feb 2026 – Present

- ▶ Co-founded Horizon.gh and lead the company's technical direction, product development and delivery across multiple software products.
- ▶ Own system architecture, technical decisions and end-to-end development, translating business requirements into scalable software solutions.
- ▶ Built ZitaSmart, a multi-tenant SaaS booking platform enabling businesses to manage services, availability and customer reservations — improving booking productivity and reach by 45% by replacing manual processes with a centralized reservation system.
- ▶ Designed and developed a yacht management platform combining a customer-facing website with a BackOffice for yacht owners to manage bookings and operations.
- ▶ Developed specialized ERP solutions for food-service businesses, modeling domain-specific workflows and operational requirements.

Software Engineer | Crescendo Digital Marketing Agency

May 2026 – Present • Part-Time → Full-Time

- ▶ Build client-facing web products and backend automation systems using React, Python and AI integrations.
- ▶ Integrate LLM-powered workflows into omnichannel customer automation across Facebook, Instagram, SMS and WhatsApp.
- ▶ Develop high-performance data extraction systems processing up to 15,000 Toyota dealer records in under 30 minutes.
- ▶ Design backend workflows and automation systems focused on scalability, reliability and operational efficiency.

Backend Software Engineer → Sub Tech Lead | Avangenio (GSI)

Nov 2024 – Aug 2026 • Miami, FL

- ▶ Progressed to Sub Tech Lead on a multi-service hotel platform, coordinating 2 developers across 10+ domain services including contracts, reservations, payments, permissions and document generation.
- ▶ Developed and maintained microservices using ASP.NET Core, EF Core, PostgreSQL and .NET Aspire.
- ▶ Implemented role-based authorization across services using Casbin.
- ▶ Improved application performance by 75% through targeted query optimization and caching strategies.
- ▶ Designed asynchronous inter-service workflows using RabbitMQ and automated contract PDF generation.

Backend Tech Lead | Aven

Apr 2024 – Nov 2024

- ▶ Led a team of 4 developers building a freelance marketplace connecting businesses with professionals.
- ▶ Guided backend architecture, technical decisions, task distribution and implementation of core business workflows.
- ▶ Developed backend services in C#/.NET covering business, offer and freelancer domain workflows.

Software Developer | Freelance / Independent

Mar 2021 – Mar 2024

- ▶ Built a patient and disease management system for a university thesis client, covering medical records, case tracking and clinical workflow management in C#/.NET.
- ▶ Developed a multi-vehicle rental reservation REST API in C#/.NET, handling availability, bookings and vehicle fleet management across different vehicle types.
- ▶ Progressively specialized in backend development, API design and software architecture in C#/.NET through self-directed study and collaborative development projects.

SELECTED PROJECTS

BookingSys — .NET 9 · ASP.NET Core · YARP · RabbitMQ · PostgreSQL · CQRS · DDD · Docker

- ▶ Designed a microservices platform covering reservation, availability, payment, reporting and audit domains using Clean Architecture and event-driven patterns.
- ▶ Implemented RabbitMQ choreography-based Saga patterns for distributed transaction coordination.
- ▶ Built a YARP API Gateway with JWT authentication, background workers, health checks and structured logging.

Azure Media Processor — .NET 10 · ASP.NET Core · Azure Blob Storage · Azure Queue Storage · BackgroundService

- ▶ Built a REST media pipeline with Blob Storage persistence and queue-based async file processing.
- ▶ Implemented a BackgroundService worker consuming queue messages, processing files and storing outputs with metadata.
- ▶ Integrated Azure SDK services for Blobs, Queues, Tables, Key Vault and Cosmos DB.

RentaApi — .NET 9 · ASP.NET Core · EF Core · PostgreSQL · CQRS · Stripe · Azure

- ▶ Designed a Clean Architecture REST API with CQRS pattern to separate read/write operations.
- ▶ Integrated Stripe payments with secure webhook handling and deployed to Azure App Service with full API documentation.

TECHNICAL SKILLS

Backend & .NET: C# · .NET · ASP.NET Core · EF Core · REST APIs · FastEndpoints · .NET Aspire

Architecture: Clean Architecture · CQRS · DDD · Microservices · Event-Driven · SOLID · Saga Pattern

Cloud & DevOps: Azure (Blob, Queue, Tables, Key Vault, Cosmos DB, App Service) · Docker · GitHub Actions

Data & Messaging: PostgreSQL · MySQL · Oracle · RabbitMQ · Async Patterns

AI & LLM: LLM Integration · Prompt Engineering · Omnichannel Automation

Other: Go · Python · FastAPI · TypeScript · JavaScript · React · Next.js · Astro

EDUCATION & LANGUAGES

B.Sc. in Computer Engineering | CUJAE – Havana | Sep 2024 – Jun 2028 (Expected)

Languages: Spanish (Native) · English (C1) · Italian (Intermediate)
